Futuristic City

It is the future of the present city that we are discussing today.

Problem - With the growth of the city, the traffic is increasing day by day.

1. The future city will be a smart city with the use of technology.

2. The future city will be a smart city with the use of technology.

Solution - To solve the problem of traffic, we have designed the futuristic city with the use of technology. When it rains, the city will be a smart city with the use of technology.
